Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-40 drawn to given points based on winning predictions, classified in class 705, subclass 14.

- II. Claims 41-42, drawn to ranking predictions, classified in class 705, subclass 37.
- 2. Inventions of group I and groups II, are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of group I has separate utility such as giving points. This separate use patentably distinguishes the invention of group I from group II, since the feature of awarding points is not a limitation of group II. Therefore the invention of group I is a separately usable subcombination. See MPEP § 806.05(d).
- 3. The inventions are distinct, each from the other because of the following reasons: the reasons given above and have acquired a separate status in the art as shown by different classification and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purpose as indicated is proper.
- 4. Since the restriction is complex and examiner knows from past experience that an election will not be made by telephone, this restriction is proper under MPEP 812.01.
